

July 28 - August 3, 2000

A successful drag makeup burn of 30 sec was conducted on day 215 (Aug. 2).

On day 213 (July 31) Terra experienced a partial Solar Eclipse (51%); the onboard EPS subsystem reported "No Battery Discharge."

There was a loss of MODIS science data losses on day 207 (July 25) due to command line problems and an operations error that is being resolved.

Current configuration for spacecraft and all instruments, except MODIS, is nominal. The focal plane temperature for MODIS is being raised to 85 degrees Kelvin for a calibration test. The MODIS instrument will undergo a decontamination procedure on day 221 (Aug. 8).

Terra Plans:

On Aug. 4, there will be an ASTER Field Campaign at Lake Tahoe. There will also be a MISR field campaign on Aug. 4 in Libya. The MODIS decontamination procedure will start on August 8.
